Zhao, B., see Bao, Q. 101

# Subject Index

Acidity
Roles of Brønsted and Lewis sites during cracking of n-octane on H-mordenite 173

Active phase in OCM
Oxidative coupling of methane over $\gamma$-alumina-supported lead oxide catalyst 117

Alkaline earth oxides
Influence of basicity on the catalytic activity for oxidative coupling of methane 27

Ammonia
Intrinsic kinetics of nitric oxide reduction by ammonia on a vanadia–titania catalyst 13

Ammoxidation
Ammoxidation of toluene over CuNa-ZSM-5 47

Antimony
Nickel passivation on fluidised cracking catalysts with different antimony complexes 61

Aurichalcite
Georgeite and azurite as precursors in the preparation of co-precipitated copper/zinc oxide catalysts 1

Azurite
Georgeite and azurite as precursors in the preparation of co-precipitated copper/zinc oxide catalysts 1

Barium hydroxide
Oxidative dimerization of methane in molten $Na_2CO_3$–$K_2CO_3$ eutectic at 800°C: Comparison with other molten salts 147

Basicity
Influence of basicity on the catalytic activity for oxidative coupling of methane 27

Basicity
Oxidative dimerization of methane in molten $Na_2CO_3$–$K_2CO_3$ eutectic at 800°C: Comparison with other molten salts 147

Bismuth
Catalytic oxidative coupling of methane on metal oxides. I. Effect of oxidation state of bismuth and reversibility of lattice oxygen on activity in barium–lanthanum–bismuth oxides 135

Carbon monoxide oxidation
Effect of catalyst pretreatment on the oxidation of carbon monoxide over coprecipitated gold catalysts 73

Catalyst characterization
Titania supported vanadium oxide catalysts for the selective oxidation of *o*-xylene to phthalic anhydride: Influence of vanadia content on activity and surface species 157

Catalyst characterization (adsorption, SEM, TA, XPS, XRD)
Surface segregation and catalytic hydrogenation properties of $Ni_{67}Zr_{33}$ amorphous alloy 101

Catalyst characterization (FT-IR)
Roles of Brønsted and Lewis sites during cracking of n-octane on H-mordenite 173

Catalyst precursors
Georgeite and azurite as precursors in the preparation of co-precipitated copper/zinc oxide catalysts 1

Catalyst preparation (precipitation)
Georgeite and azurite as precursors in the preparation of co-precipitated copper/zinc oxide catalysts 1

Coking
Nickel passivation on fluidised cracking catalysts with different antimony complexes 61

Copper
Ammoxidation of toluene over CuNa-ZSM-5 47

Copper/zinc oxide
Georgeite and azurite as precursors in the preparation of co-precipitated copper/zinc oxide catalysts 1

Cracking
Roles of Brønsted and Lewis sites during cracking of n-octane on H-mordenite 173

Decomposition
Catalytic decomposition of nitrogen dioxide over various metal oxides 229

Fluid catalytic cracking
Nickel passivation on fluidised cracking catalysts with different antimony complexes 61

Georgeite
Georgeite and azurite as precursors in the preparation of co-precipitated copper/zinc oxide catalysts 1

Glassy alloy
Surface segregation and catalytic hydrogenation properties of $Ni_{67}Zr_{33}$ amorphous alloy 101

Gold
Effect of catalyst pretreatment on the oxidation of carbon monoxide over coprecipitated gold catalysts 73
Hydrogen formation
Hydrogen formation in propane oxidation on Pt–Rh/$CeO_2$/$Al_2O_3$ catalysts 89
In-situ FT-IR
Titania supported vanadium oxide catalysts for the selective oxidation of *o*-xylene to phthalic anhydride: Influence of vanadia content on activity and surface species 157
Kinetics
Intrinsic kinetics of nitric oxide reduction by ammonia on a vanadia–titania catalyst 13
Lead oxide/lead aluminate
Oxidative coupling of methane over $\gamma$-alumina-supported lead oxide catalyst 117
Low-temperatue oxidation
Effect of catalyst pretreatment on the oxidation of carbon monoxide over coprecipitated gold catalysts 73
Malachite
Georgeite and azurite as precursors in the preparation of co-precipitated copper/zinc oxide catalysts 1
Metal oxide catalyst
Catalytic decomposition of nitrogen dioxide over various metal oxides 229
Methane oxidative coupling
Influence of basicity on the catalytic activity for oxidative coupling of methane 27
Methane oxidative coupling
Catalytic oxidative coupling of methane on metal oxides. I. Effect of oxidation state of bismuth and reversibility of lattice oxygen on activity in barium–lanthanum–bismuth oxides 135
Methane oxidative coupling
Oxidative coupling of methane over $\gamma$-alumina-supported lead oxide catalyst 117
Methane oxidative dimerization
Oxidative dimerization of methane in molten $Na_2CO_3$–$K_2CO_3$ eutectic at 800°C: Comparison with other molten salts 147
Methanol synthesis
Georgeite and azurite as precursors in the preparation of co-precipitated copper/zinc oxide catalysts 1
Molten carbonates
Oxidative dimerization of methane in molten $Na_2CO_3$–$K_2CO_3$ eutectic at 800°C: Comparison with other molten salts 147
Molten salts
Oxidative dimerization of methane in molten $Na_2CO_3$–$K_2CO_3$ eutectic at 800°C: Comparison with other molten salts 147
Mordenite
Roles of Brønsted and Lewis sites during cracking of n-octane on H-mordenite 173
Nickel
Nickel passivation on fluidised cracking catalysts with different antimony complexes 61
Nickel–zirconium alloy
Surface segregation and catalytic hydrogenation properties of $Ni_{67}Zr_{33}$ amorphous alloy 101
Nitric oxide reduction
Intrinsic kinetics of nitric oxide reduction by ammonia on a vanadia–titania catalyst 13
Nitrogen dioxide
Catalytic decomposition of nitrogen dioxide over various metal oxides 229
Nitrogen oxides
Intrinsic kinetics of nitric oxide reduction by ammonia on a vanadia–titania catalyst 13
Nitrous oxide
Intrinsic kinetics of nitric oxide reduction by ammonia on a vanadia–titania catalyst 13
Oxidation state
Catalytic oxidative coupling of methane on metal oxides. I. Effect of oxidation state of bismuth and reversibility of lattice oxygen on activity in barium–lanthanum–bismuth oxides 135
Passivation
Nickel passivation on fluidised cracking catalysts with different antimony complexes 61
$PbAl_2O_4$ spinel
Oxidative coupling of methane over $\gamma$-alumina-supported lead oxide catalyst 117
PbO/$\gamma$-alumina
Oxidative coupling of methane over $\gamma$-alumina-supported lead oxide catalyst 117
Phthalic anhydride
Titania supported vanadium oxide catalysts for the selective oxidation of *o*-xylene to phthalic anhydride: Influence of vanadia content on activity and surface species 157

Platinum–rhodium
Hydrogen formation in propane oxidation on Pt–Rh/$CeO_2$/$Al_2O_3$ catalysts 89
Precipitation
Georgeite and azurite as precursors in the preparation of co-precipitated copper/zinc oxide catalysts 1
Pretreatment
Effect of catalyst pretreatment on the oxidation of carbon monoxide over coprecipitated gold catalysts 73
Propane oxidation
Hydrogen formation in propane oxidation on Pt–Rh/$CeO_2$/$Al_2O_3$ catalysts 89
Propane steam reforming
Hydrogen formation in propane oxidation on Pt–Rh/$CeO_2$/$Al_2O_3$ catalysts 89
Rare earth oxides
Influence of basicity on the catalytic activity for oxidative coupling of methane 27
Recycle reactor
Titania supported vanadium oxide catalysts for the selective oxidation of *o*-xylene to phthalic anhydride: Influence of vanadia content on activity and surface species 157
Selective catalytic reduction
Intrinsic kinetics of nitric oxide reduction by ammonia on a vanadia–titania catalyst 13
Selectivity ($C_{2+}$ hydrocarbons)
Influence of basicity on the catalytic activity for oxidative coupling of methane 27
Selectivity ($C_{2+}$ hydrocarbons)
Oxidative coupling of methane over $\gamma$-alumina-supported lead oxide catalyst 117
Selectivity (ethane, ethene)
Oxidative dimerization of methane in molten $Na_2CO_3$–$K_2CO_3$ eutectic at 800°C: Comparison with other molten salts 147
Selectivity (ethylbenzene)
Surface segregation and catalytic hydrogenation properties of $Ni_{67}Zr_{33}$ amorphous alloy 101
Sodium
Ammoxidation of toluene over CuNa-ZSM-5 47
Sodium-potassium eutectic
Oxidative dimerization of methane in molten $Na_2CO_3$–$K_2CO_3$ eutectic at 800°C: Comparison with other molten salts 147
Styrene hydrogenation
Surface segregation and catalytic hydrogenation properties of $Ni_{67}Zr_{33}$ amorphous alloy 101
Surface segregation
Surface segregation and catalytic hydrogenation properties of $Ni_{67}Zr_{33}$ amorphous alloy 101
Surface species
Titania supported vanadium oxide catalysts for the selective oxidation of *o*-xylene to phthalic anhydride: Influence of vanadia content on activity and surface species 157
Titania
Titania supported vanadium oxide catalysts for the selective oxidation of *o*-xylene to phthalic anhydride: Influence of vanadia content on activity and surface species 157
Toluene
Ammoxidation of toluene over CuNa-ZSM-5 47
Vanadia
Titania supported vanadium oxide catalysts for the selective oxidation of *o*-xylene to phthalic anhydride: Influence of vanadia content on activity and surface species 157
Vanadia–titania
Intrinsic kinetics of nitric oxide reduction by ammonia on a vanadia–titania catalyst 13
Water
Intrinsic kinetics of nitric oxide reduction by ammonia on a vanadia–titania catalyst 13
Water-gas shift
Hydrogen formation in propane oxidation on Pt–Rh/$CeO_2$/$Al_2O_3$ catalysts 89
*o*-Xylene oxidation
Titania supported vanadium oxide catalysts for the selective oxidation of *o*-xylene to phthalic anhydride: Influence of vanadia content on activity and surface species 157
Zeolites
Roles of Brønsted and Lewis sites during cracking of n-octane on H-mordenite 173
Zeolites (ZSM-5)
Ammoxidation of toluene over CuNa-ZSM-5 47
Zirconium
Surface segregation and catalytic hydrogenation properties of $Ni_{67}Zr_{33}$ amorphous alloy 101
